

AQUASMART- HYBRID

Very Fast Drying, Water based, Fully Aliphatic Polyurethane Hybrid Coating for Waterproofing and Protection

Waterproofing and Protection of:

- Concrete roofs
- PU foam,
- Roofs,
- Light roofing made of metal or fibrous cement,
- Under tile applications such as wet rooms

- Water based
- Fully aliphatic (no yellowing, no need for top coat)
- Very fast drying
- Easy to apply & repair
- Thixotropic

- Seamless, elastic
- Highly resistant to stagnating water
- Water vapor transmission: The film breathes so there is no accumulation of humidity under the coat.
- Excellent weather and UV resistance.
- Easy coloring of product with water based pigment pastes
